Save Water

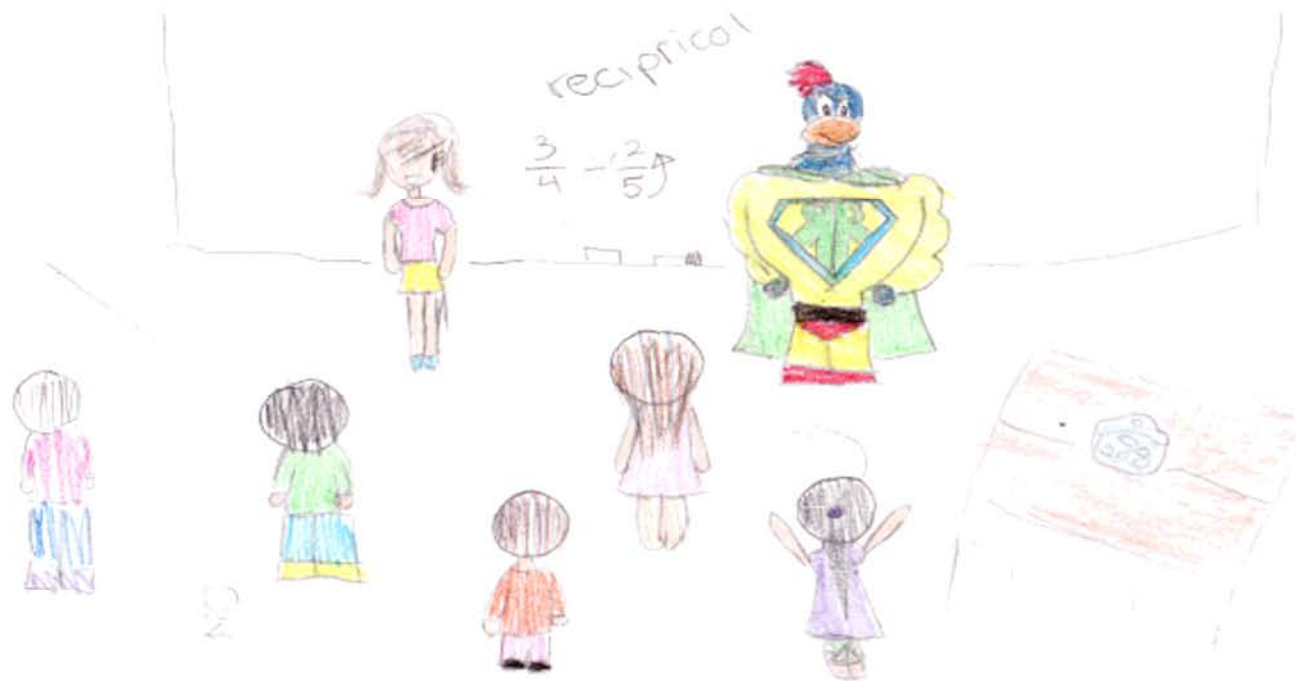

Saves the Planet

Written and Illustrated by Mrs. Fuller's 4/5 Combo Class

2008_2009 School Year – Ruskin Elementary School

By. uyen

One regular afternoon, the Ninja Penguins in Mrs. Fuller's class were startled when a large road runner appeared out of nowhere.

"Good afternoon boys and girls," said the large bird. "I am Rodney, and I am here to help you save the planet."

One brave student shouted out, "How can we save the planet, we're just kids."

"I'm glad you asked, that's why I'm here. Everyone, even kids, can do something to protect the environment." said the enormous feathered Super hero.

"My challenge is this," said Rodney. "I want each of you to think of one thing, no matter how small, that you can do to help our planet."

"How do we know what to do?" asked an anxious student.

"I have confidence in you." replied Rodney. "I will be back in one week. Let's see what you can do."

One week later, Rodney returned and here is what he found...

Hey Rodney!
How do you feel
about saving energy?
I think saving energy
is important. I save
energy by turning off
electrical items when
I don't need them.
I turn off the light
when I don't need to
stay in the room
anymore. Can you
do that too? Live
up to the challenge
of saving the planet?

To help save Earth, I won't litter and will tell other people not to litter. Littering can make the Earth dirty. So if you see litter pick it up and throw it in the trash can. Littering is bad, so don't litter.

♥ We should take shorter showers to help save the planet. The more ♥ water you use, the more money you pay. The second reason why you need to take shorter showers, is because we are still in a drought. We should conserve water so everyone can use it, including animals. I'll take shorter showers everyday to conserve water.
- Andrew

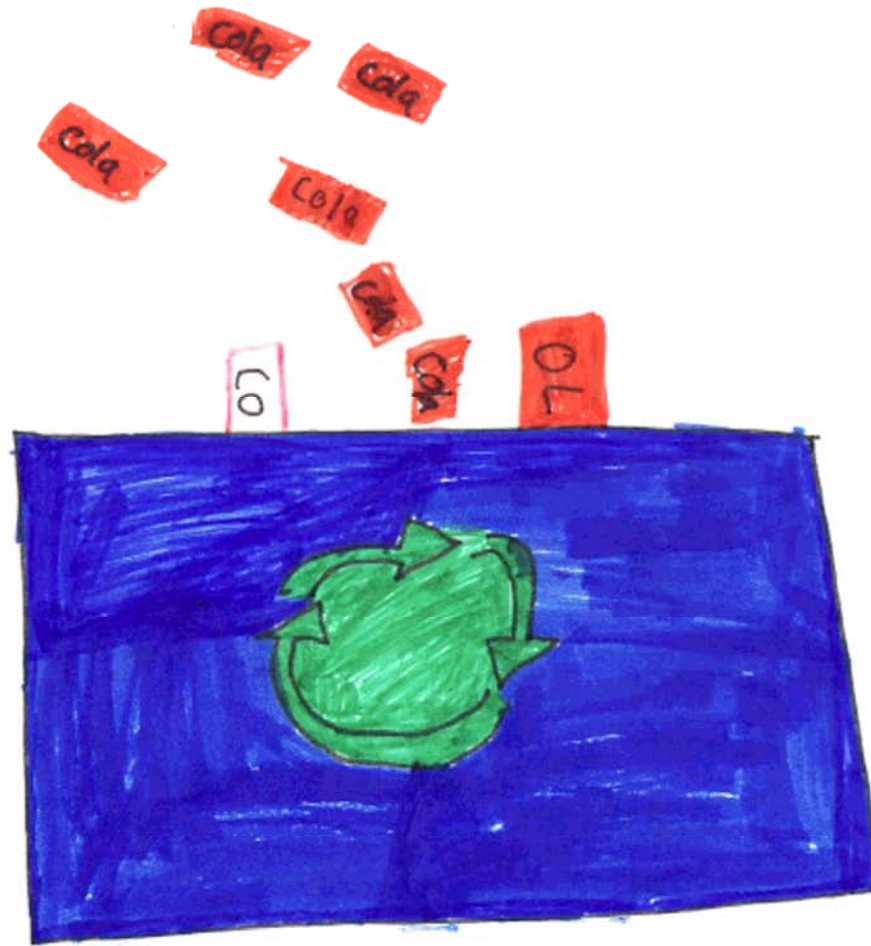

Anisha

Rodney, I am going to use Ziploc containers for my lunch and snack to save the planet. This saves the planet by not wasting plastic bags. You can even use containers when you travel or go somewhere.

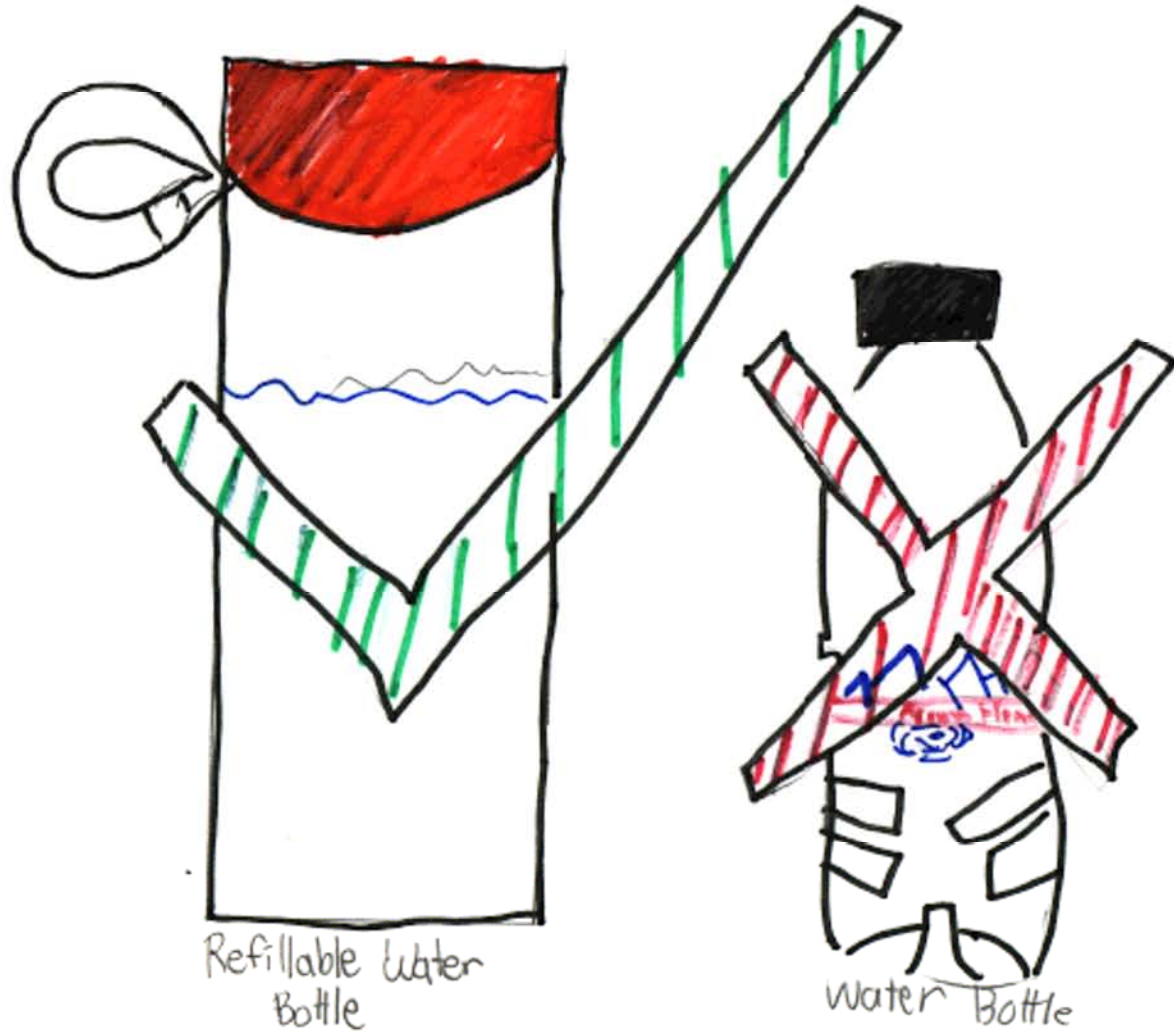

Hey Rodney, to save the planet I will recycle bottles and cans.
You can turn them into new cans and bottles. Recycling also means less
bottles and cans in the landfill.

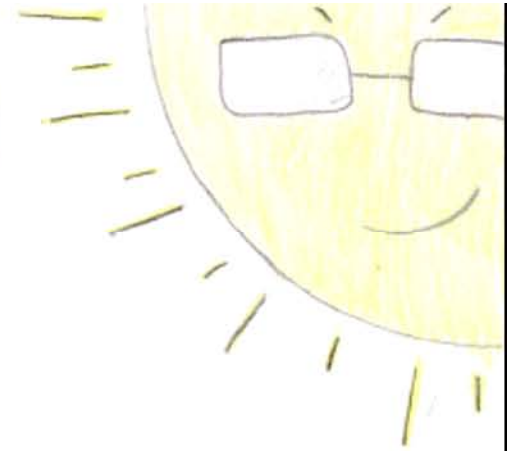

Brandon

Caleb

To help the planet I am going to use a refillable water bottle. That reduces water bottles in landfills and conserves the use of plastic. It also saves your money! So, don't use a water bottle use a refillable one!

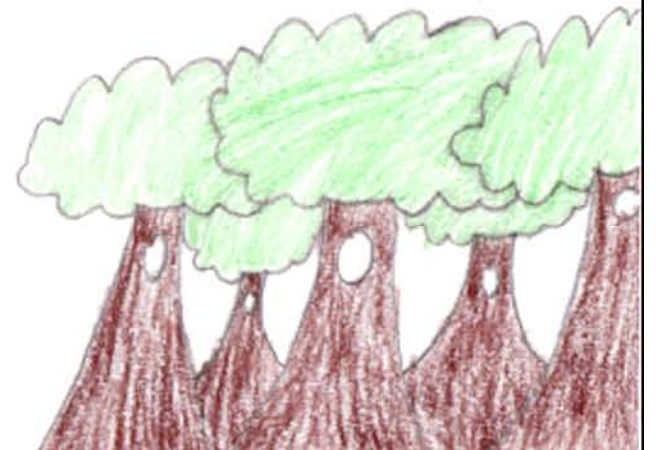

By: Cody

To help our planet, I will plant trees. Trees are really important. That's why we should plant more of them. If we didn't have trees, then we wouldn't be able to breathe. There are less and less trees these days. 😊

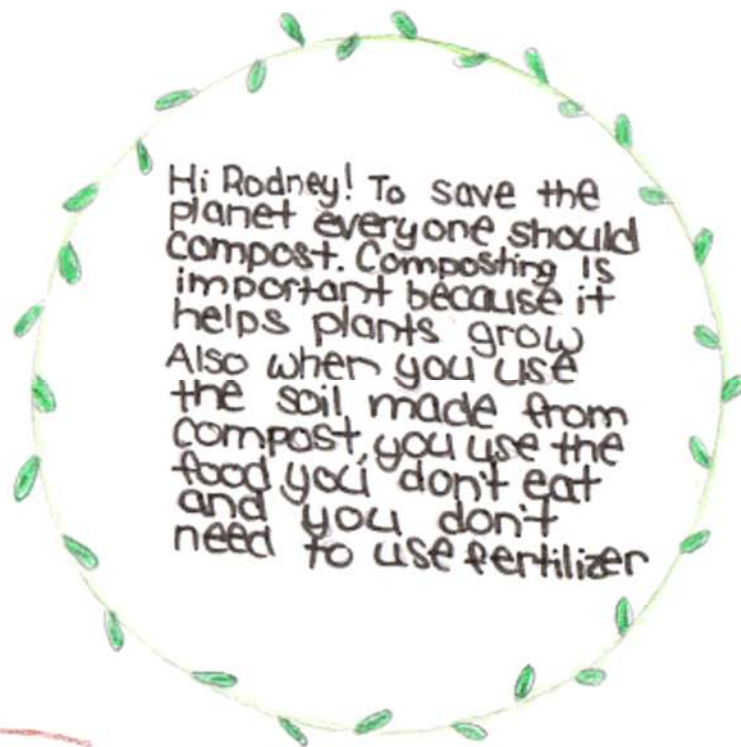

Plant More Trees! 🌳

By: Elaine

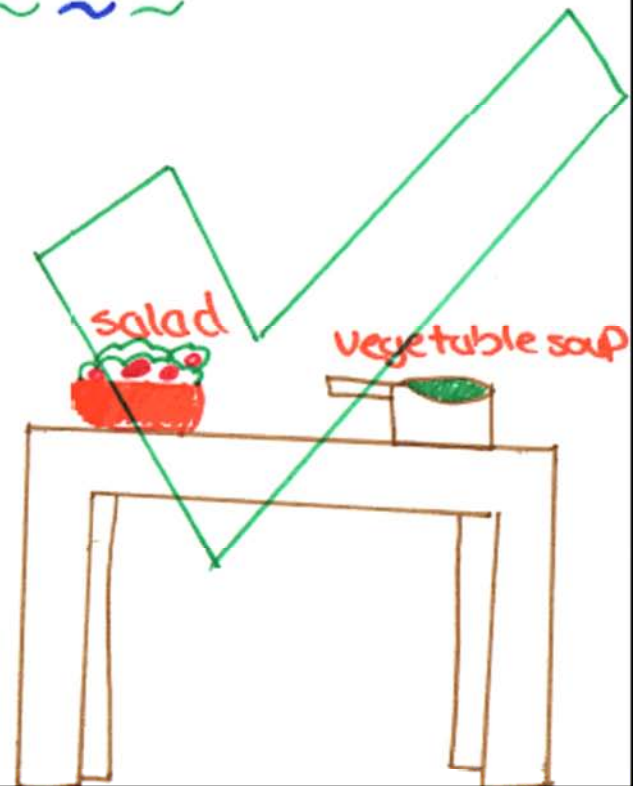

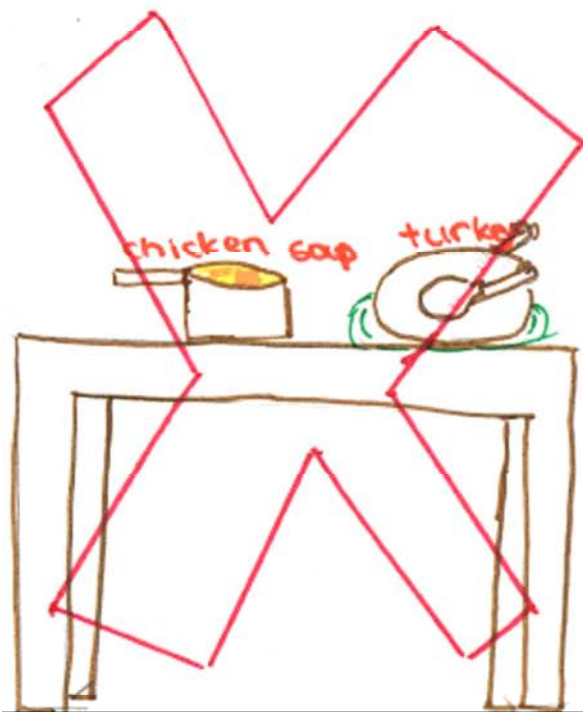

I'm donating
this to the
compost bin

Hi Rodney! To save the planet everyone should compost. Composting is important because it helps plants grow. Also when you use the soil made from compost you use the food you don't eat and you don't need to use fertilizer.

#29 Emily

Rodney, to save the plant lets try
not to eat too much meat. If you
keep on eating meat, you will want to
buy more which will cause people to
kill more animals. The more people
eat meat, the more animals farmers
need to raise. Animals' farts are
poisonous which can pollute the sky.

Hi Rodney, To help keep the Earth clean, we should all keep our water clean. In order to do that, we need to stop polluting the water. Don't throw bottles, aluminum cans, and garbage into the water.

Thanks for keeping Earth clean,
Janelle

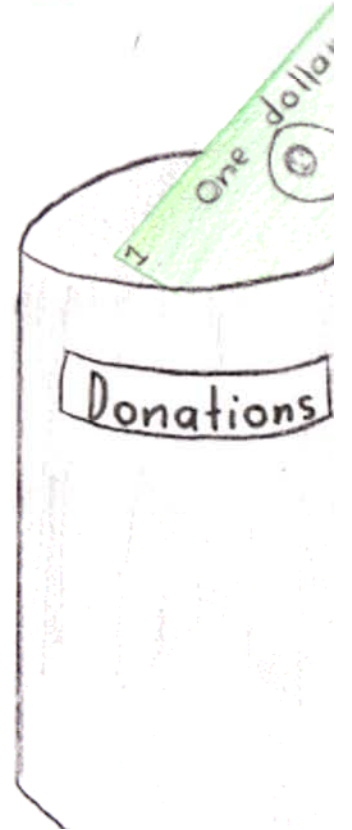

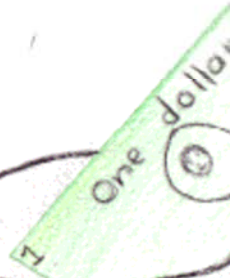

Jonathan

Hi, I'm Jonathan. I am going to help the planet by avoiding toxic fertilizer. I will use organic fertilizer instead. Toxic fertilizer pollutes, and it kills bugs that can help the environment.

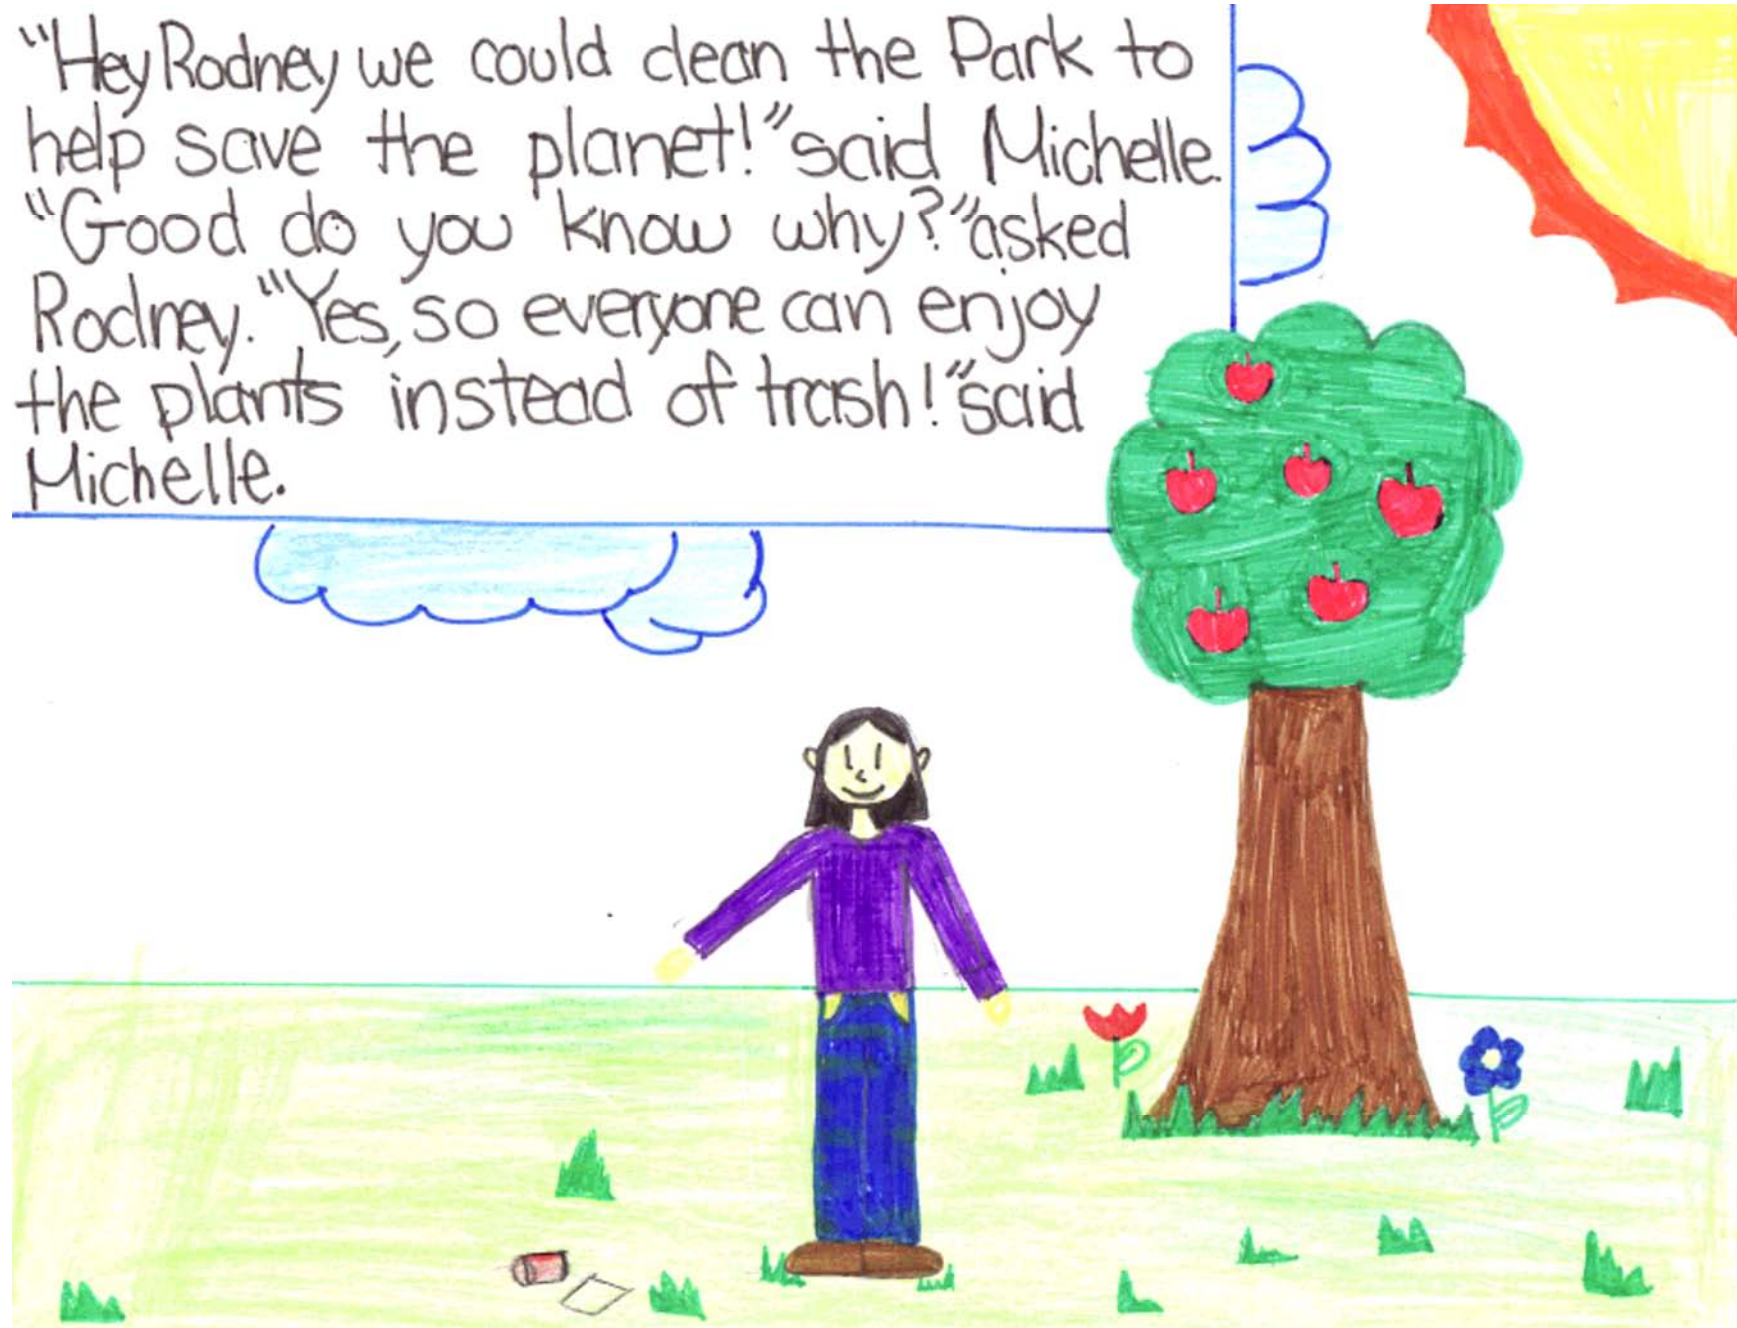

Rodney! My name is Laura
and I think we could raise
money to donate to zoos and
park reserves. They need money
to keep protecting the wildlife,
and if we donate money to the
zoos and parks, we would be saving
the animals. By saving the animals,
we could save the planet.

Hi I'm Jenna Mae. To save the planet, people should avoid using paper items, unless they need them. It is important to do this because, if you use paper plates, napkins, forks and spoons at dinner you always throw it away. But if you use glass dishes you can just wash them, and use it again.

"Hey Rodney we could clean the Park to help save the planet!" said Michelle.
"Good do you know why?" asked Rodney. "Yes, so everyone can enjoy the plants instead of trash!" said Michelle.

To save the planet I will only take as much as I can eat. People think it doesn't matter if you waste food, but it has a very important impact on the planet and its people. We should sometimes stop and think about what is on our plate. We grow our own food, so if we waste it, we are also wasting time and energy. And if we waste food, we're wasting the planet. Thanks for listening
Rodney.

By: Mikhaela

Monique ت

Hey! Do you walk or ride to school? If you do walk or ride your bike to school that is excellent! If you don't then you should start! This suggestion will conserve money, gas, and time! Thanks for supporting Rodney!

Thanks for walking! - Rodney Roadrunner

Hey Rodney! I am going to help people reuse items. Instead of buying soo many bottles, you can use a reusable bottle. you can also use containers of yogurt, cheese, and so on to fill up instead of buying soo many containers. Bye!

I DONT CARE

I care about the Earth!

Nonreusable

Plastic

Reusable bottle

Hey Rodney,

Perry

What I'm going to do to protect the Earth is not using pesticides in my garden. When you use pesticides, they soak into the soil, eventually entering water, and harming a lot of life. Instead, I will use ladybugs. They can get rid of pests without polluting.

Hey Rodney! Today

I'm going to recycle paper because I think recycling paper is important. Did you know that you can recycle any kind of paper? When you recycle paper, it gets made into other things, like tables, that you use at home and school. Recycling paper is saving the planet, so I'm going to do my part, and save the EARTH!

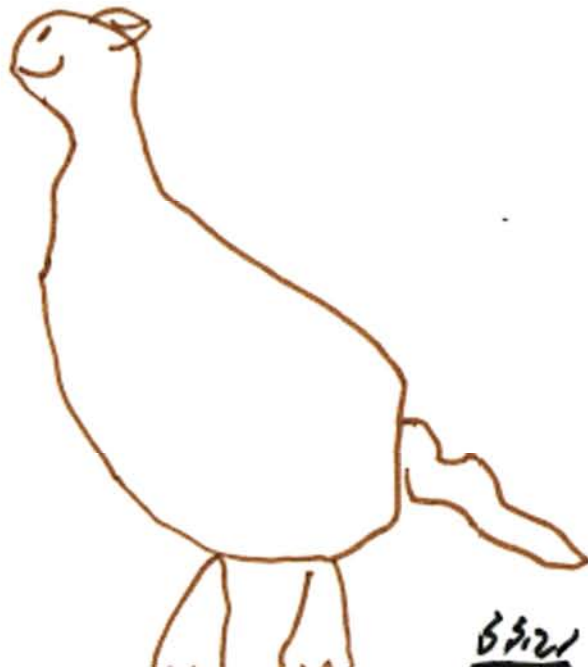

I'm taking this paper to the recycle bin!

by: Rainey

Clean it UP 

People should clean up after their dog. if we dont, when it rains, the doo doo will run into our lakes, Rivers, and oceans. That pollutes our earth.

Go Green 

It's more economical to use a fan than air conditioner. An air conditioner uses more energy and releases harmful carbon monoxide. A fan doesn't and uses less energy.

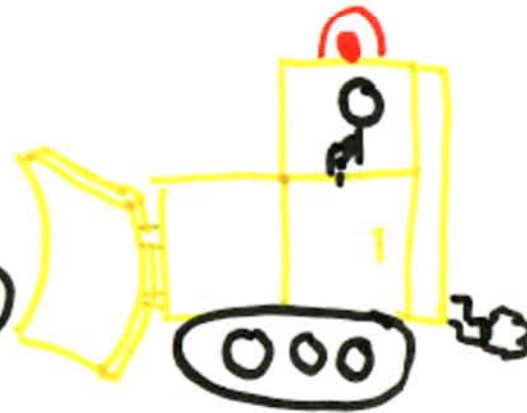

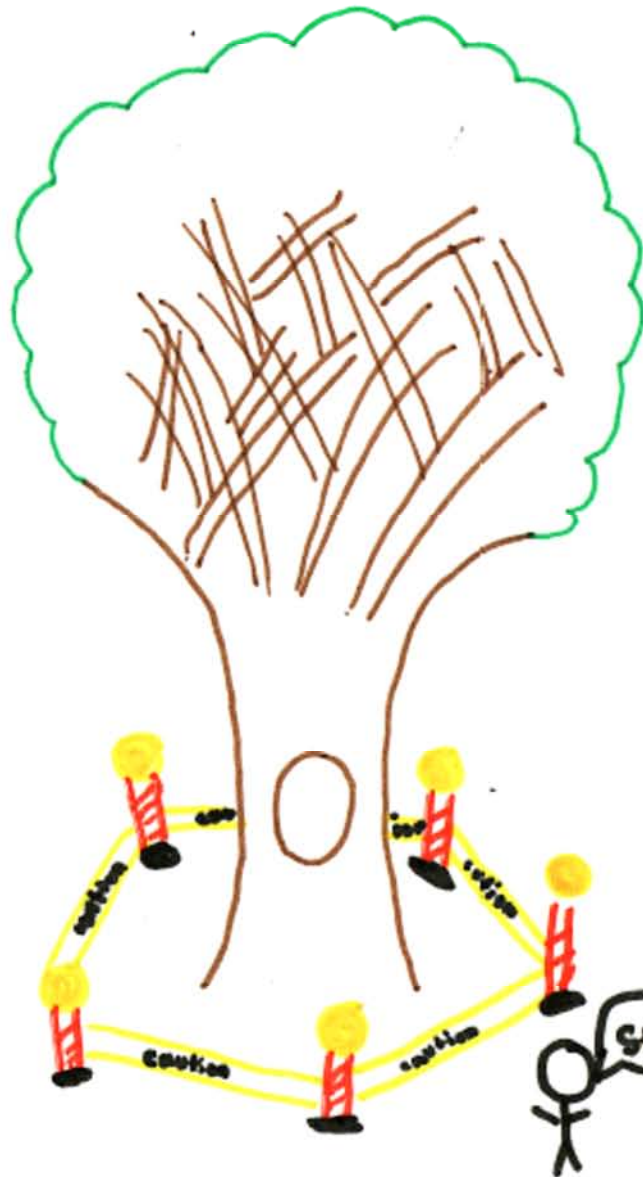

By: Roger

Hi, I'm Shai-Anh. In order to save the planet I think we should avoid using animal fur products. This is important because animals are an important part in our ecosystem.

Hey Rodney, to help our planet I will try to stop people from cutting down trees. If I don't the trees will all disappear. Since the trees give off oxygen if all the trees are all gone, there's won't be a lot of fresh air left.

Thach

Hi Rodney I have an idea to save the planet. My idea is, "do not smoke". I think its important because if you smoke you endanger your own life and other people. Also, cigarette butts never decompose, so toxins are soaking into our soil. I hope people will stop soon.

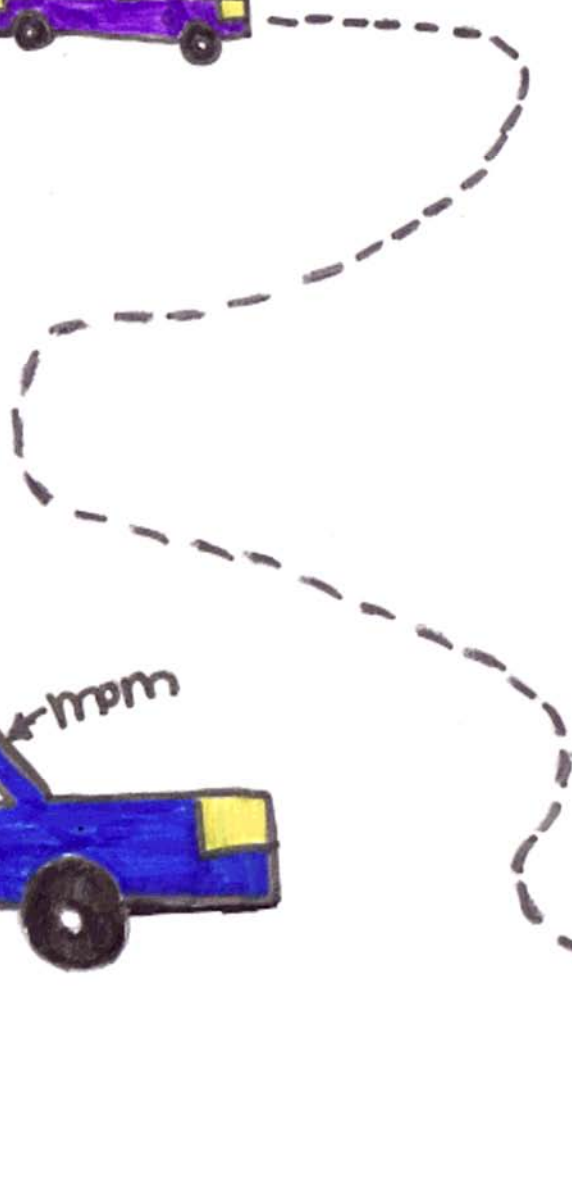

I'll just leave
my cigarette here
and kill plants
and smoke
to get cancer.
NOT!

Everybody don't
Smoke!

★ Home --- 

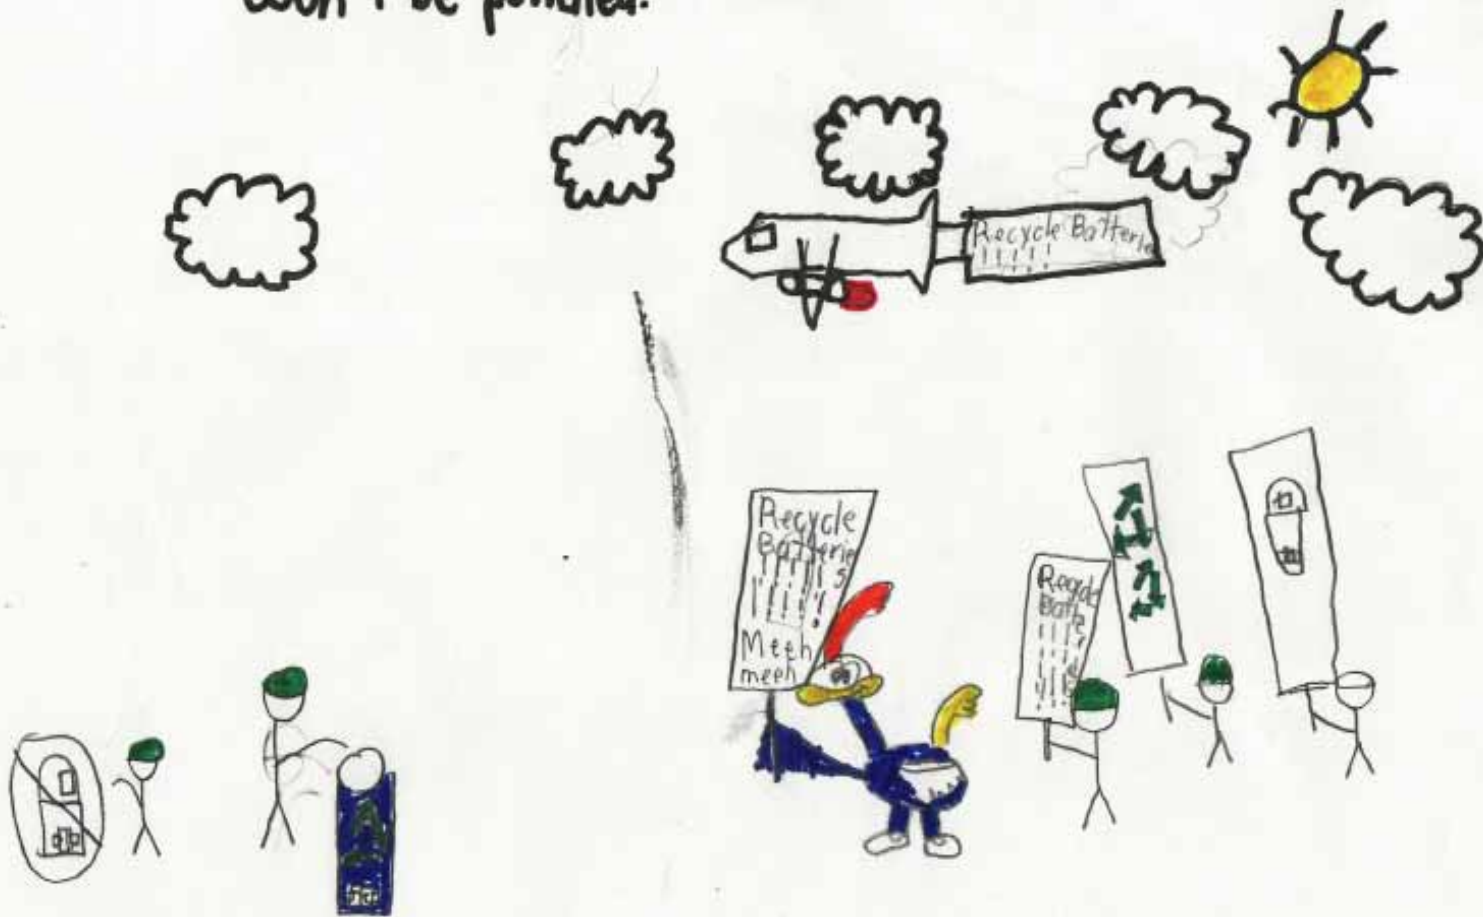

Hi Rodney! To help the planet I will carpool with my friends and family. The less we use our car, the less gas is used, and there will be less pollution.

By: Uyen

★ School

Hey there, I'm Vincent and I'm going to save the world by Recycling Batteries. Batteries are hazardous waste so, by recycling them the world won't be polluted.

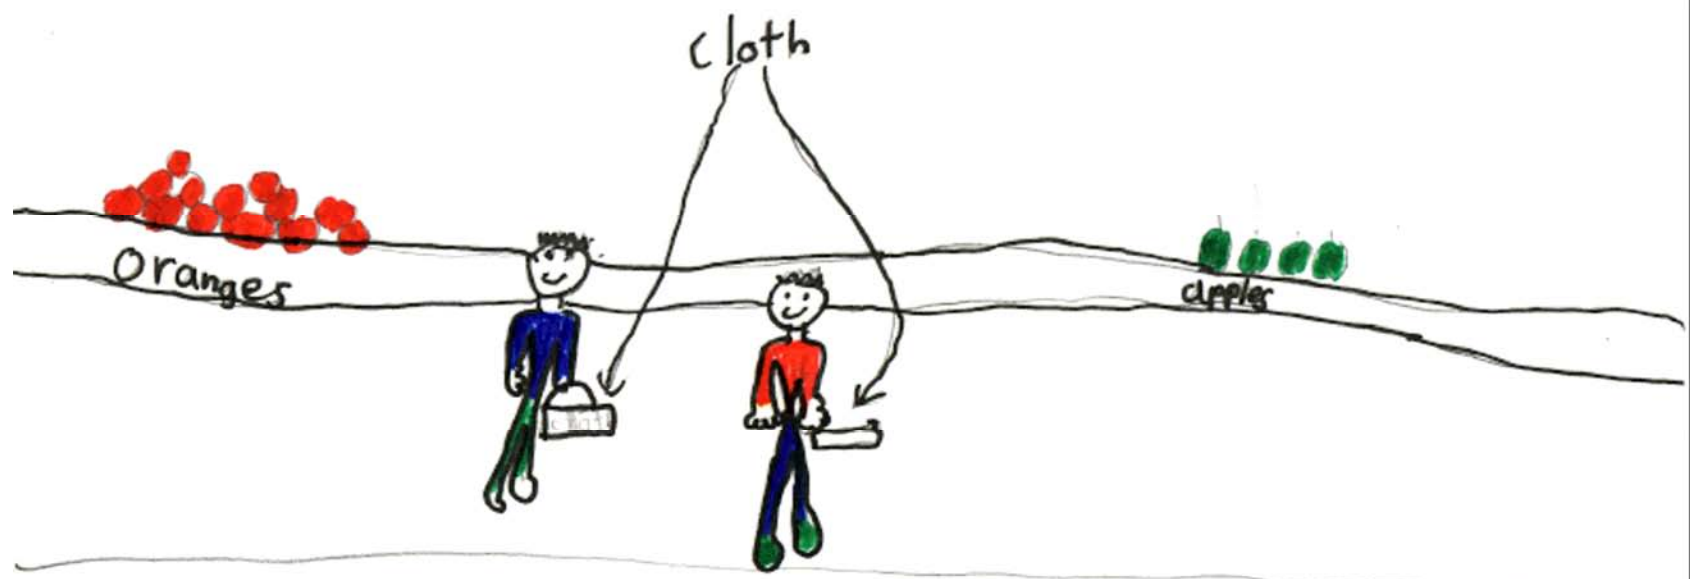

Hi Rodney!

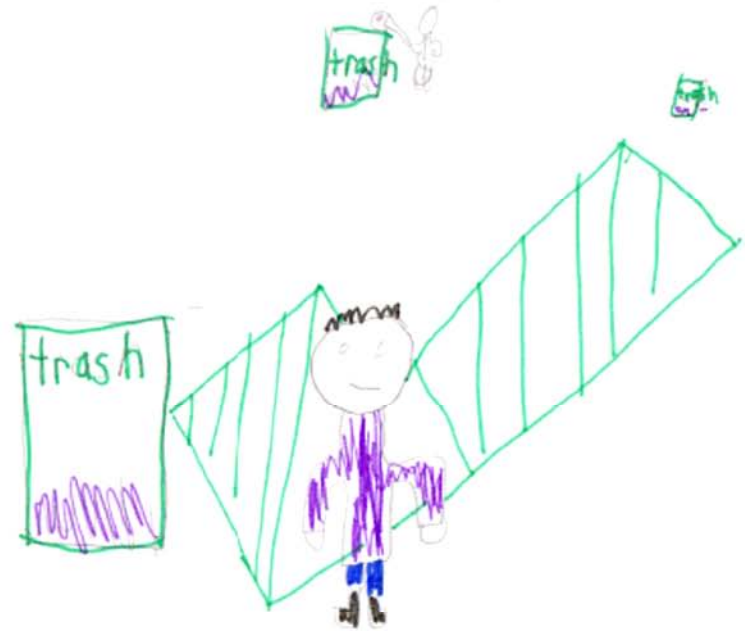

To save the planet, I will bring my own bag to the grocery store, because people can't reuse store bags.

People need to cut down trees to get the paper for paper bags.

wilson

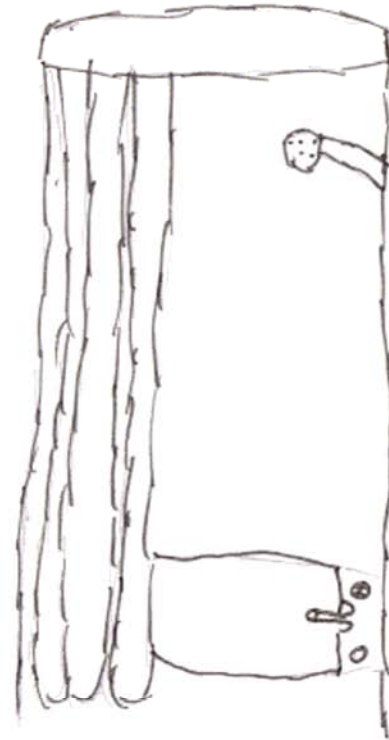

Hey Rodney I know how to save the planet I can pick up trash. It helps by helping the environment survive and save the animals from eating them. Not to mention to keep the place clean. What could also happen is that if trash is left on the floor it can make trees not grow and no oxygen.

Winston Liew

ZACHARY #15

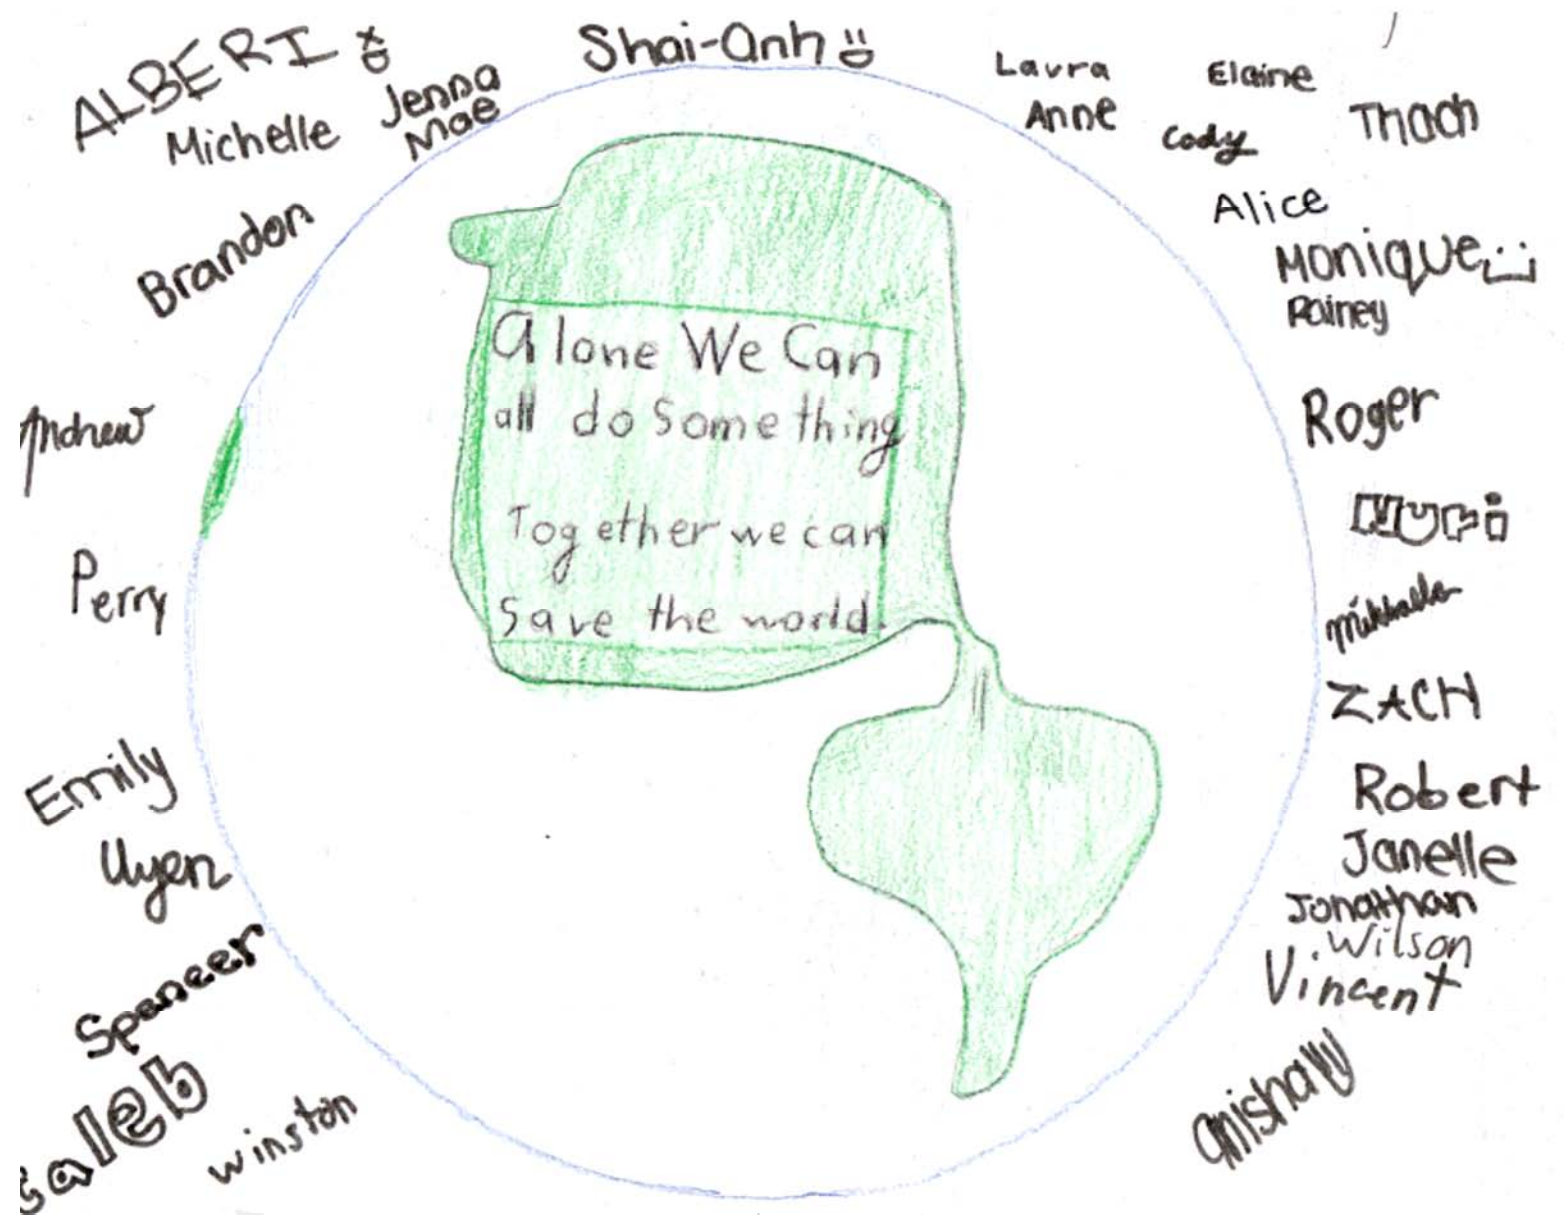

Hey Rodney! To save the Planet I'm going to turn the faucet off while I'm brushing my teeth. Saving water is important because nothing can substitute for water and all living things depend on water.

Rodney was so proud of what Mrs. Fuller's class had come up with, that he awarded them the "Golden Planet Award." The Ninja Penguins proudly displayed their award for all to see.

OOOH... AHHH!
